Fazua Connectivity

Bluetooth Connection

NEW

The evation Connectivity Software 2.0 update enables you to establish a Bluetooth Low Energy (BLE) connection between the FAZUA Remote, in which the Bluetooth chip is installed, and a compatible bicycle computer or third-party device.

*Compatibility**

A third-party device is basically compatible if it has a BLE interface (Bluetooth 4.0 or higher).

For example compatible with the manufacturers Garmin, Sigma and Wahoo.

*All bikes equipped with a Bluetooth®-enabled Remote from model year 2019 onwards are compatible. This applies to all Remote b with serial numbers 1805113000 or higher. Customers whose bikes are not yet compatible can contact a Fazua Certified Partner and ask about the **Remote Exchange Program**.

evation Connectivity Software 2.0

Advantages

NEW

The open Bluetooth interface gives you the freedom to decide for yourself which device you want to use while riding – be it your own smartphone, a navigation device, a bicycle computer or wearables such as a fitness watch.

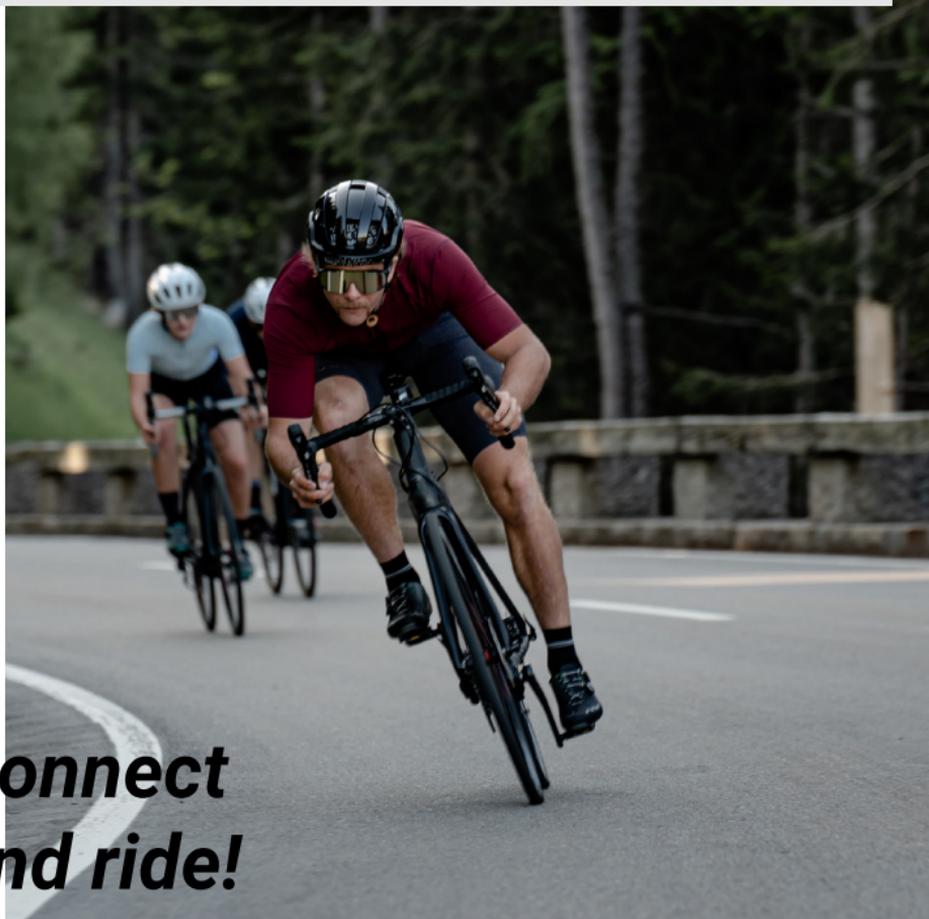

Live on your display:

- Rider power
- Speed
- Cadence

Update now!

For installing the Connectivity Software 2.0, you will need the update of the FAZUA Rider App first, which is available for free download in the App Store and Google play. The latest version enables you to install the Connectivity Software 2.0.

***Connect
and ride!***
