# SOFTWARE DEVELOPER (m/f)

Fulltime

We are **FAZUA**. A young company on its way to revolutionize the eBike market. We created the innovative evation drive system especially for sportive needs. The unique, slim design and light weight of just 3,3 kg combines motor, battery and electronics in one drivepack. Therefore, bike manufacturers can create frames that integrate the drivepack elegantly and discreetly within the down tube.

We need you to continue our success story!

**What you should have:**
- Bachelor/Master in Computer Science or equivalent.
- A great sense of responsibility (and humor).
- Resourcefulness, (very) creative and positive thinking.
- The ability to code in Java and sharp eye for UX/UI.
- Knowledge in web will be appreciated (JavaScript, React, Python, HTML, CSS).
- Git lover.
- Teamwork guru.
- Passion for his/her work and aim for excellence.
- English is a must, German is a plus.

**These are your tasks:**
- You will help developing between a wide range of projects, both for internal and public use, e.g: our beloved Service Software
- You will be hand to hand with our team of hard workers engineers, directly involved in projects related to FAZUA's technology, from production to service, from FAZUA to the world

**This is what we offer to you:**
- Steep learning curve
- Young and dynamic team
- Fair payment
- High Level of personal responsibility
- The possibility to grow with FAZUA and to develop your talents

If you are the perfect person for us send your CV with a motivation letter to: Begoña Alvarez, alvarez@fazua.com
