

FULL STACK DEVELOPER (m/f)

Fulltime position

We are **FAZUA**. A young company on its way to revolutionize the eBike market. We created the innovative evation drive system especially for sportive needs. The unique, slim design and light weight of just 3,3 kg combines motor, battery and electronics in one drivepack. Therefore, bike manufacturers can create frames that integrate the drivepack elegantly and discreetly within the down tube.

We need you to continue our success story!

What you should have:

- Software/IT/Engineering Master's Degree (or very close to finish).
- A great sense of responsibility (and humor).
- Resourcefulness, creative and positive thinking.
- Python/Django, CSS, HTML & JavaScript (React) are your daily diet.
- Git lover.
- Strong organizational and planning skills.
- Teamwork guru.
- Passion for his/her work and aim for excellence.
- Multidisciplinary. Interest for other fields, such as embedded systems, means a vast power.
- English is a must, German is a plus.

These are your tasks:

- Maintain and develop our online platform and service offer.
- You will be hand to hand with our team of hard workers engineers, directly involved in projects related to FAZUA's technology, from production to service, from FAZUA to the world.

This is what we offer to you:

- Smooth learning curve
- Young and dynamic team
- Fair payment
- High Level of personal responsibility
- The possibility to grow with FAZUA and to develop your talents

If you are the perfect person for us send your CV with a motivation letter: Juan Antonio Fernández de Alba, fernandez@fazua.com
