

INTERN FOR R&D DEPARTMENT (m/f)

Fulltime Internship

We are **FAZUA**. A young company on its way to revolutionize the eBike market. We created the innovative evation drive system especially for sportive needs. The unique, slim design and light weight of just 3,3 kg combines motor, battery and electronics in one drivepack. Therefore, bike manufacturers can create frames that integrate the drivepack elegantly and discreetly within the down tube.

We need you to continue our success story!

What you should have:

- Technical background (studies or training)
- Manual skills
- A great sense of responsibility
- Proactive mindset
- Resourcefulness, creative and positive thinking
- Passion for his/her work and aim for excellence
- English is a must, German is a plus

These are your tasks:

- Our Internship will help our products grow from prototyping to mass production, empowering the future of e-mobility
- You will be working with our team of talented engineers in solutions related to battery management systems, power electronics, analog and digital circuitry, or custom designs based on FAZUA's technology

This is what we offer to you:

- Smooth learning curve
- Young and dynamic team
- Fair payment
- High level of personal responsibility
- The possibility to grow with FAZUA and to develop your talents

If you are the perfect person for us send your CV with a motivation letter to: Philipp Kalläne kallaene@fazua.com
