

## Software Developer(m/f)

Full-time

---

Fazua is an ambitious and dynamic mid-sized company with almost 60 employees located in Ottobrunn. We have set ourselves the goal of revolutionizing the eBike market in the long term. In 2017, with our innovative evation drive system, we were able to present a drive system that focuses primarily on sporty requirements while still conveying the natural driving sensation of a non-motorized bicycle.

In order to continue our success story, we are looking for you!

### What you need:

- Bachelor's or Master's degree in computer science or related
- Experience in Java programming, JavaFX and UI/UX
- Ideally experience in web applications (JavaScript, React, Python, HTML and CSS)
- Knowledge in Git and GitHub

### These are your tasks:

- Ongoing development of company-internal software to analyse the FAZUA drive system
- Data management to save automatically generated testing protocols
- Ongoing development of software applications in the production line
- Data management to save serial numbers and traceability data
- All tasks should be done with consideration of usability and operator convenience
- Substitution for website maintenance

### What we offer:

- The opportunity to grow with FAZUA and develop yourself personally
- Young and dynamic team
- Refreshingly new conception of industry, work and team spirit
- High degree of personal responsibility, right from the start
- Attractive payment
- Voluntary social benefits (company pension plan)
- Flexible working hours
- Possibility to lease a bike or pedelec via JobRad portal
- Possibility to commute to work on a staff eBike

Sounds interesting? Then simply send your CV and motivation letter to Monika Tot ([jobs@fazua.com](mailto:jobs@fazua.com)).
