

Electrical/Computer Engineer (m/f/d)

Intern/student traineeship

Passion

- Biking

Tasks:

You will support us in ongoing development projects. From the programming of ARM controllers and the independent soldering of circuit boards to hardware tests, we offer a wide range of activities to develop your own knowledge and skills and give you deep insights into our development work in the Electronics Department.

Requirements

- Advanced engineering studies in the field of electrical engineering/computer science
- Bike/eBike affinity

You can acquire or deepen these skills with us:

- Architecture: ARM
- Programming language: C, Python, bash
- Protocols: CAN, I2C, SPI, USB
- Knowledge of basic electrical engineering analog/digital
- Eclipse
- Git
- Linux
- Logic analyzer

You are convinced that you complement our team with your passion and your knowledge? Then we are exactly looking for you!

Send us your CV and a motivation letter to jobs@fazua.com*

In special cases, travel costs can be covered under arrangement.
